The new works of Alberto Magrin take life from the “theory of coincidences” and from a mediation between the sky and earth, between the dreamlike and the everyday. Like a modern shaman, the artist receives messages and conveys them to us as photographed images that are accessible to everyone. The lyricism which sets his work apart is the result of an

ironic play on coincidences, a destiny which has been mapped out, that only the sensitivity of the artist can bring to life before us. The exhibition displays new works that have evolved from experiencing and recreating life, characterized by symbolic interpretation as if the artist has wished to reinterpret a divine message. (Monica Sampietro)
